

Rural Energy Grant Scheme

Guidance Notes & Application Form

Aim.

This scheme provides financial assistance to rural businesses for the purchase of a 24-hour power system that incorporates a renewable energy source.

Eligibility.

In order to qualify for assistance under this scheme the business should have been continuously trading in Camp for a period of 12 months prior to the application. Accounts will need to be shown to prove a business is operating and is viable.

For the purpose of eligibility for rural energy grant scheme 'Camp' will be defined as: businesses located more than 10km from Christ Church Cathedral, Stanley and farm businesses within the 10km boundary (which are defined as farm businesses where farm activities are the primary activity, with a business turnover exceeding £10,000 or stock numbers exceeding 2000 Dry Sheep Equivalents as verified by the annual agriculture statistics collected by the Agriculture Department) It will exclude businesses located within the boundaries of Mount Pleasant Complex and Fox Bay village (the boundaries are defined as being connected to their electricity grid or within the reach of the grid network).

The business should remain in the property that is connected to the 24- hour power system, as their main business address, for a period of 5 years from the date of the award of the grant.

All buildings that are connected to the system electrically must meet the current Electrical Regulations (17th edition) a test certificate must be provided for records (assistance is available for domestic properties if required).

A business who has previously benefitted from power equipment supplied under the Rural Energy Grant Schemes is not eligible for a reapplication. However, businesses may qualify for assistance under the Rural Energy Additional Generation Grant Scheme, please contact the Development Manager at FIDC for more information regarding this.

The scheme is to provide assistance with initial capital costs only and cannot be used to purchase spare parts, duplicate or replacement equipment.

Rural Energy Grant Scheme

Guidance Notes & Application Form

Grant Assistance.

A grant of up to 50% is available towards covering the cost of a battery bank, an inverter and their installation (including testing)

A grant of up to 70% is available for covering the cost of the renewable energy technology (maximum output per year 5,000Wh per business day) and its installation.

Installation includes electrical works, the heavy-duty power cable to connect the renewable energy technology to the battery, transport to the site and the cost of cement for mounting foundations. It does not include the aggregate or the cost of mixing concrete or preparing ground.

All applicants must comply with the manufacturer's operating instructions and best practice guides. The full system is to be insured and maintained as specified by the supplier for the life of the equipment as a mandatory requirement for the first 5 years after installation.

All equipment must be approved by the Microgeneration Certification Scheme (www.microgenerationcertification.org). FIDC and FIG are not liable for any damage caused to a property by the installation of any equipment under this scheme.

Enquiries.

If you have any queries or require more information about this grant scheme please contact the Development Manager.
